Forecast for Sunday 23 Jun 2024

Weather: Low cloud and extensive hill fog at first, the cloud thick enough for some patchy light drizzle, mainly over western facing slopes. Cloud gradually lifts this morning, then breaking at times this afternoon to allow warm sunny intervals to develop. Winds remaining light throughout.

Chance of cloud-free hill tops above 600m: 20% at first. Becoming 100% by early afternoon.

Low cloud and visibility: Extensive low cloud at first with bases 100-200ft shrouding tops, especially in the west, bringing very poor visibility and challenging navigation. Cloud lifting this morning, clearing the summits by late morning. Good or very good visibility then follows for the rest of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Navigation will be very difficult at first due to extensive low cloud and hill fog, especially over southern and western slopes. Only very experienced navigators should attempt it. However, conditions will gradually improve this morning.

Recent rainfall: measured at Neuadd: altitude 353m

02:00 on Sun 23 Jun 2024	0mm	3.2mm	3.2mm

Forecast for Monday 24 Jun 2024

Weather: A dry day with light winds and varying, often large amounts, of cloud, but also some very warm sunny spells. Occasional hill fog is possible overnight and around dawn, but will be far less extensive compared to today and will quickly clear.

Maximum wind: 10mph, locally 20 mph from the south.

Chance of cloud-free hill tops 600m: 80% at first, becoming 100% by mid-morning.

Low cloud and visibility: Isolated clouds covering the highest peaks at first, but these quickly clearing. Visibility generally good or very good, but locally poor perhaps very poor at first.

Temperature: **Valleys:** 12 increasing 22 C
At 600m: 14 increasing 17 C
Freezing level: Above the summits.
